

# Holiday Candle Care Guide

## Trim the Wick

Always trim your wick to 1/4 inch before lighting for a cleaner, longer burn.

## First Burn

Let your candle burn long enough to melt the wax evenly across the top to prevent tunneling.

## Burn Safety

Never leave a burning candle unattended and keep away from children, pets, and drafts.

## Why Beeswax?

Beeswax burns cleaner and produces a warm, natural glow with a subtle honey aroma.
